Worcester, MA | (860) 707-9164 | khmcauliffe@gmail.com | https://www.linkedin.com/in/kurt-mcauliffe

Professional Summary

GIS graduate with experience in geospatial analysis, remote sensing, spatial data management, and environmental applications of GIS. Skilled in ArcGIS Pro, QGIS, Python, R, PostgreSQL, and Google Earth Engine, with an Earth science background supporting analysis of environmental and geographic data.

Education

Master of Science in Geographic Information Science, Clark University 8/2024 - 5/2026
Bachelor of Science in Earth Science and Policy, Penn State University 8/2020 - 8/2024

Relevant Skills and Coursework

Software
ArcGIS Pro • Python • R • QGIS • PostgreSQL • Google Earth Engine • Survey123
Technical Skills
Geospatial analysis • Cartographic design • Table and data management • Database management • Field surveying • Geostatistics
Coursework
Advanced Vector GIS • Advanced Raster GIS • Remote Sensing • Python and Computer Programming for GIS • Spatial Database Management • Quantitative Methods in GIS • Earth Systems Modeling

Leadership and Impact

Eagle Scout: Directed 20+ volunteers in planning and constructing a pollinator garden project, resulting in earning the highest possible rank in the program.
Biodiversity campaign: Created first biodiversity position article on Cytiva's behalf. Drove discussion from the global sustainability team on developing biodiversity policy further.

Work Experience

Sustainability Marketing and Communications Internship
Cytiva, Marlborough, MA 6/2026 - 8/2026
- Generated hundreds of engagements for sustainability articles within weeks of publication.
- Led four multimedia campaigns supporting sustainability initiatives and ongoing progress.
- Authored Cytiva's first biodiversity position article, prompting discussion among global sustainability leadership regarding future biodiversity policy development.

EcoReps Assistant Program Coordinator 3/2023 - 5/2024
Penn State Housing & Food Services, University Park, PA
- Collaborated with other organizations to maximize outreach for the program's initiatives, resulting in over 1,000 successful interactions with students on campus.
- Led a committee by delegating external outreach, creating procedures for outreach, and monitoring progress with collaboration efforts.
- Worked with a leadership team of ten to organize meetings, prepare agendas, and develop programs for over 60 other members of the cohort.

Soil Science Internship 1/2020 - 7/2020
CT Resource Conservation & Development, Haddam, CT
- Assisted with soil characterization activities and field procedures.
- Supported outreach communication initiatives for soil science concepts.
- Worked independently on multiple environmental communication and data collection projects.
